SpanSet

SpanSet Certified Safety

GOTCHA® - ORIGINAL RESCUE SOLUTIONS FOR WORK AT HEIGHT

TRUSTED WORLDWIDE. CERTIFIED BY SPANSET.

ABOUT GOTCHA®

Gotcha is the SpanSet Trademark for our range of Height Safety Rescue Kits.

The development of the original Gotcha Kit in 2000 - The first pre assembled, remotely attachable rescue kit – made 1st response rescue a possibility for workers at height .
Since then SpanSet has created a whole range of kits catering for all aspects of work at height and Gotcha has become the name to trust.

Since its creation in 2000, the Gotcha® range has defined industry standards for 1st Response Rescue, providing safe, efficient, and easy-to-use solutions for bringing suspended workers back to safety following a fall from height.

Always look to SpanSet and our approved partners for advice or support on Gotcha products and services. Gotcha rescue kits are clearly branded giving you the reassurance of their quality and innovation.

SpanSet provide the highest quality training to support Gotcha products – Always look for the rescue sticker.

THE IMPORTANCE OF 1ST RESPONSE RESCUE

We all recognise medical first aid as an essential part of workplace safety. It bridges the gap before emergency services arrive and can make the difference between life and death.

For those who work at height, 1st Response Rescue serves the same purpose.

When a worker falls and is left suspended in a harness immediate action is vital – not only to prevent further injury but to enable the provision of medical 1st aid. First you need to get them to the nearest point of safety.

Relying solely on the emergency services for rescue is not a compliant or practical plan. Rescue must begin on site - quickly, confidently, and safely.

GOTCHA®: THE 1ST AID KIT FOR WORKERS AT HEIGHT

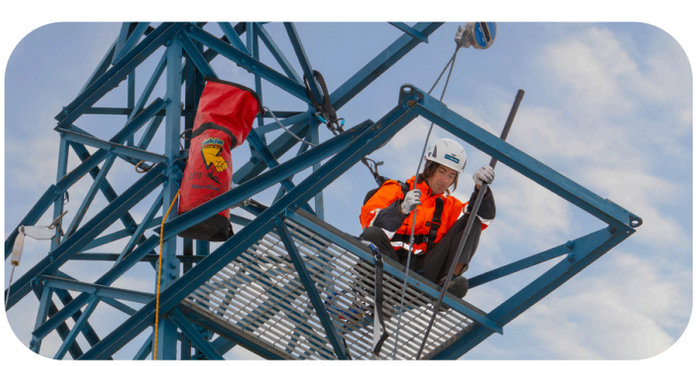

When SpanSet developed the original Gotcha® Rescue Kit, the goal was simple, to get people back to safety as fast and as safely as possible, allowing first aid to begin immediately.

Much like a medical first aid kit, Gotcha® kits are designed to be:

- **Ready-to-use with no complex setup.**
- **Specific to the work environment and type of access system in place.**
- **Operable by trained on-site personnel, not emergency responders.**

Today's Gotcha® kits have evolved to be lighter, easier to transport, and more versatile, while maintaining the pioneering safety features SpanSet introduced - including remote attachment to keep rescuers out of danger.

GOTCHA® - THE 1ST AID KIT FOR WORKERS AT HEIGHT.
DEVELOPED, MANUFACTURED, AND CERTIFIED BY SPANSET UK.

CERTIFIED GOTCHA® TRAINING

All Gotcha® Rescue Training must be delivered by SpanSet UK or an officially authorised training partner.

We are the only organisation authorised to certify Gotcha® Rescue training worldwide.

Our training ensures that users:

- **Understand how to select the correct Gotcha® kit for their environment.**
- **Can deploy the system quickly and safely in a real rescue scenario.**
- **Are compliant with the Work at Height Regulations, which require employers to have a rescue plan in place for all personnel working at height.**

Training is conducted by SpanSet instructors who are industry specialists, ensuring competence, confidence, and compliance.

THE LEGAL & SAFETY OBLIGATION

The Work at Height Regulations require all employers to plan for emergencies — including rescue.

A well-planned rescue, ready to be implemented immediately, protects both the casualty and the rescuers. While the emergency services must always be called, waiting for them to arrive is not an acceptable plan.

Rescue should begin immediately using a pre-assembled Gotcha® system and trained personnel, ensuring rapid recovery and medical response.

SpanSet®

WHY CHOOSE THE ORIGINAL GOTCHA®

Trademarked and Authentic – Only available from SpanSet or approved distributors.

- **Proven Performance – Trusted globally across construction, telecoms, utilities, renewables, and emergency services.**
- **Designed by Experts – The first ever pre-assembled rescue kit, refined over 25 years.**
- **Certified Training – Only SpanSet and our authorised partners can certify Gotcha® Rescue users.**
- **Compliant & Reliable – Developed to meet the highest standards of safety and performance.**

PROTECTING THE GOTCHA® BRAND

Gotcha® is a registered trademark of SpanSet Ltd.
The use of the Gotcha® name, logo, or imagery without permission is strictly prohibited.

All marketing materials, product imagery, and training certification must be approved by SpanSet.

If you are unsure whether a training provider, supplier, or image is authorised, please contact Rachael.Hazeldine@spanset.co.uk for verification.

If you need guidance on rescue planning or advice on the correct Gotcha® kit for your operations, our team of experts is here to help.
