Excel-Pro Harness with Belt

Order Code

2024138 - small
2024139 - medium
2024140 - large

What is it?

Professional work positioning harness for engineers who work at height.

What can it be used for?

Industrial climbing applications where fall arrest techniques are needed to reach the work area, and work positioning techniques are required to securely hold the worker in place while tasks are carried out.

What can I use it with?

- SP140 Fall Arrest Lanyards
- CLIMA Work Position Lanyards
- DSL3 Energy absorbing lanyards

Who can use it?

Working at height carries significant risk, so it's vital that all users are properly trained in the pre-use inspection, fitting, adjustment, and correct use of their harness. As long as the harness fits correctly, it will safely support the user—regardless of their weight. Available in three sizes, the harness is designed

with a 10:1 safety factor and is rated for users up to 150kg.

How long will it last?

- The product has a 10-year period of obsolescence.
- The lifespan may also be reduced by the effects of damage or wear and tear.
- The lifespan will cease at the point when any one of these conditions is met.
- The condition of the product must be controlled in accordance with BS8437:2005, this requires regular inspections to be carried out by a competent person.

How has it been tested?

- Type tested and CE marked for Europe under the PPE Regulations to EN361 & EN358
- Additionally tested to Australian standard AS/NZS 1891.1:2020.
- The SpanSet manufacturing process is quality controlled and audited by the British Standards Institute to the international standard for quality management ISO9001.

Product Guide

Excel-Pro Harness with Belt

What is it made from and why?

(Specification and Materials)

- Aluminium quick connect buckles for ease of fitting
- Supple 45mm webbing for comfort
- Padded breathable mesh for comfort with prolonged use
- Hi-visibility Lanyard Parking Point to stow lanyards when not in use
- 10kg Rated Gear Loops for tool tethers

Additional SpanSet Features

Individual Serial Numbering – All SpanSet height safety products are individually serial numbered for traceability.

What paperwork is supplied?

(Product Records and Information)

- Multilingual Instructions with pictorial guide.
- Individual Product History Card – This record card contains all the documentation required to maintain the product. The front forms the European Declaration of Conformity and the table on the reverse can be completed to for the inspection record.

What training is required?

Although in itself this is a simple item to use, there are several stages that should be considered as part of the process as a whole. Training is available for all the stages outlined at the SpanSet training school in Middlewich or subject to suitability on a site of your choice.
